

POSITIONING OF THERMASSURERF WITH PROBE

BENEFITS OF USING OUR PROBED UNITS VS TRADITIONAL PROBED LOGGERS:

- ➊ Easier closure of the box & Much easier stacking (neutral form factor),
- ➋ Immediate temperature reading ("X-Ray Thermometer") & downloads without breaking seals,
- ➌ No need to open the isothermal part of the box to confirm a temperature breach, since the red LED will blink to signal alarm breach,
- ➍ ON/OFF button to start the tag right after the box is setup,
- ➎ No need to precool / precondition the tags (fast response time),
- ➏ More cost efficient solution; less logger breakage; time saving...
